Separation Studio® NXT

color separation software

Gain control of color separations through screen print focused automations, tools and features.

- two separation engines: vector pdf and raster Spot Process®
- auto converts unwanted process colors to useful spot colors
- load and edit custom textile and press ink sets
- fast processing of files
- beneficial support of transparency
- automatic underbase with choke and spread
- auto color adjustment and manual user controls
- easy color reduction (merging) with PressFit™
- reduce files to 6-colors using the ColorCrunch™ feature
- use Knockout White feature to save a screen
- separation management for complex gradients
- fly out tools and dockable floating windows
- pressmarks saved into file
- direct print thru AccuRIP® Emerald, Ruby, Black Pearl and SE
- direct hot folder printing using other RIP brands

AccuRIP® Emerald

RIP software

Achieve precision in halftones, solids, edges and gradients for professional-grade screen exposure.

- easily print to film solid and halftone separations
- dye ink optimized – use Freehand's Dmax® black dye
- print to any printer using the Certify Printer™ feature
- two print modes – All Black Ink® and Select Tank™
- accurate preview with Proof Positive® with Zoom and Pan
- save film by nesting multiple separations with ease
- image placement control on media
- save processed separations as DCS2.eps and .TIF files

SHARED BENEFITS of ACCURIP and NXT

- downloadable software for MacOS and Windows
- easy online activation with Freehand® License Manager
- feature and OS compatibility updates included
- unlimited US-based support from Freehand's in-house team
- developed by Freehand® – a forty+ year strong company

Together, Dane Clement and Freehand inspire a culture of dedication to screen printing!
